

E5CB

Unbeatable price/performance from the world's leading manufacturer.

- Set up your configuration within 30s
- Large display (16.2 mm) legible up to 5m
- Speed-up your application with a loop-update time of 250ms
- Built to last and regulate precisely
- Omron's unique 2-PID algorithm / auto-tuning on board
- Easy remote parameterization via Thermo Mini software tool

The dual-display temperature controller that's simplicity itself

Thanks to a clear and easy-to-use menu structure, the E5CB General Purpose Controller is extremely user friendly. But despite very simply layered, the E5CB still offers the high performance inherited from the E5CN series. For instance, important functions, such as auto-tuning combined with 2-PID control make setting up easy and guarantee maximum long-term stability. And it has a lot more to offer besides, such as an ergonomic, space-saving design with only 60 mm of depth beneath the panel. And even if no power supply is available, the E5CB can be parameterized with only a few clicks using the free ThermoMini remote software.
