

## Compact, Resistant to Mutual Interference, and Ideal for Picking a Variety of Parts.

- Mounts to a parts rack and uses indicators to show parts picking procedures. Functions as a mistake-proofing Sensor.
- Use either the built-in LED indicators or external picking indicators.

Be sure to read *Safety Precautions* on page 7.

## Features

### Sensing Distance of 3 m

### Selectable Display Mode: All Lighting, All Flashing, Elevator-like Lighting, Accordion-like Lighting

- Six picking indicators provide very clear displays.
- Selectable display speed (slow/fast)

All lit

All flashing

Elevator effect

Accordion effect

### External Picking Indicators Can Be Connected

An indicator (M22N Series, etc.) can be directly connected to the Picking Sensor and mounted in an easy-to-see location.

Indicator  
M22N Series \*

F3W-D052□P

\* Be sure to check the power supply voltage before use.  
For more information on the M22N Series,  
refer to the A22N/M22N/A30N Data Sheet (Cat. No. A254).

## Ordering Information

### Sensors

 Infrared LED

Sensing method	Appearance	Connection method (cable length)	Sensing distance	Beams		Sensing width (mm)	Output type	External indicator	Model
				Gap	Qty				
Through-beam		Pre-wired (5 m)	 3 m	25 mm	5	100	NPN open collector	---	F3W-D052A *1
								Possible	F3W-D052AP *1
		Pre-wired connector (2 m)						---	F3W-D052B *1, 2
								Possible	F3W-D052BP *1, 2

\*1. Models with PNP outputs are also available. To order PNP Models, replace A with C in the model number for a Pre-wired Model and B with D in the model number for a Pre-wired Connector Model (Example: F3W-D052C).

\*2. The XS2F-D521-□G0 is the applicable connector cable. The colors of the external sheathes of the conductors, however, are different. Refer to the XS2.

### Accessories (Order Separately)

#### Mounting Brackets

Appearance	Model	Qty	Remarks
	F39-L10	two per set	L-shaped Mounting Bracket (mounting screws included)
	F39-L11	two per set	Flat Mounting Bracket (mounting screws included)

#### Protective Bracket

Appearance	Model	Qty
	F39-L12	One each for Emitter and Receiver (mounting screws included)

#### Y-shaped Joint Plugs and Sockets (Cable with Connectors on Both Ends)

Appearance	Overall length	Model	Qty
	2 m	XS2R-D526-S001-2	1
	5 m	XS2R-D526-S001-5	1

#### Y-shaped Joint Plugs and Sockets without Cable

Appearance	Model	Qty	Remarks
	XS2R-D526-S003	1	Connecting cable: <ul style="list-style-type: none"> <li>• Cable with connectors on both ends: XS2W Series</li> <li>• Cable with connector on one end: XS2F Series 4-conductor models</li> </ul>

### Sensor I/O Connectors

(Models for Pre-wired Connectors: A Connector is not provided with the Sensor. Be sure to order a Connector separately.)

Size	Type	Appearance	Cable length	Model
M12	Socket on one cable end	Straight	2 m	XS2F-D421-D80-F
			5 m	XS2F-D421-G80-F
		L-shape	2 m	XS2F-D422-D80-F
			5 m	XS2F-D422-G80-F
	Socket and plug on cable ends *	Straight/Straight	2 m	XS2W-D421-D81-F
			5 m	XS2W-D421-G81-F
		L-shape/L-shape	2 m	XS2W-D422-D81-F
			5 m	XS2W-D422-G81-F

Note: 1. Each model includes one cable. A cable is required for both the Emitter and the Receiver (two cables total).

2. Refer to *Sensor I/O Connectors/Sensor Controllers* on your OMRON website for details.

\* Straight type/L-shape type combinations are also available.

# F3W-D

## Ratings and Specifications

Sensing method Item Model		Through-beam	
		F3W-D052A (P) *1	F3W-D052B (P) *1
Sensing distance		3 m, switchable between LONG mode (1 to 3 m) and SHORT mode: (0.05 to 1 m), factory-set to SHORT mode.	
Beam gap		25 mm	
Number of beams		5	
Sensing width		100 mm	
Standard sensing object		Opaque, 35 mm dia. min.	
Light source (emission wavelength)		Infrared LED (860 nm)	
Power supply voltage		12 to 24 VDC±10% (ripple (p-p): 10% max.)	
Power consumption		Emitter: 0.6 W max., Receiver: 0.7 W max.	
Control output		NPN open collector with 100 mA max. at 30 VDC NPN open collector output type Dark-ON or Light-ON (selectable)	
Picking instruction indicator input		Open collector with relay or transistor input Indicator ON: Input voltage of 0 to 2 V Indicator OFF: Open (with leakage current of 0.1 mA max.)	
Protection circuits		Reverse-connection protection, output short protection, and mutual interference prevention function (set with frequency switch)	
Response time		Operate/Reset: 10 ms max.	
Indicators	Receiver	Operation indicator (orange), stability indicator (green), and 6 picking indicators (orange), UNI-WIRE Direct Connection Models: Transmission indicator (orange) *2	
	Emitter	Power indicator (green), different frequency indicator (green), and 6 picking indicators (orange), UNI-WIRE Direct Connection Models: Transmission indicator (orange) *2	
Ambient temperature		Operating: -10° to 55°C, Storage: -25° to 70°C (with no icing or condensation)	
Ambient humidity		35% to 85% (with no condensation)	
Insulation resistance		20 MΩ min. (at 500 VDC)	
Dielectric strength		1,000 VAC 50/60 Hz for 1 min	
Vibration resistance (destruction)		10 to 50 Hz, 1.5-mm double-amplitude for 2 hours each in X, Y and Z directions	
Shock resistance (destruction)		500 m/s <sup>2</sup> , 3 times each in X, Y and Z directions	
Degree of protection		IEC60529: IP62 (with the operation cover closed)	
Connection method		Pre-wired Standard cable length: 5 m *3	Pre-wired connector (M12 5-pin connector) Standard cable length: 2 m *3
Weight (packed state)		Approx. 360 g	Approx. 230 g
Materials	Case, indicator windows	ABS resin	
	Lens	Acrylic resin	
	Operation cover	Nylon (PA6)	
Accessories		Instruction manual	

\*1. The F3W-D052□P Emitters are provided with the external picking indicator output line shown in the following table.

Item	F3W-D052AP, F3W-D052BP
Connection method	Pre-wired (standard cable length: 300 mm)
Electrical specifications	Output current: 50 mA max. Output voltage: Fixed at Sensor power supply voltage

\*2. The transmission indicator indicates bus transmission status.

\*3. The following cable lengths are also available.

F3W-D052A (P): 2 m, 7 m

F3W-D052B : 1 m, 3.5 m

## I/O Circuits

### NPN Open-collector Outputs

Model	Operation mode	Timing chart	Mode selector switch	Output circuit
F3W -D052A F3W -D052AP F3W -D052B F3W -D052BP	<b>Dark-ON mode</b>  <b>ON:</b> One beam or more is interrupted  <b>OFF:</b> No beam is interrupted		<b>D-ON (DARK ON)</b>	 <p>Note: The circled numbers represent the pin numbers for Pre-wired Connector Models.</p> <p>*1. The sections surrounded by single-dashed lines are applicable to the F3W-D052AP-L/BP-L only.</p> <p>*2. The circled numbers represent external picking indicator output pin numbers.</p>
F3W -D052B F3W -D052BP	<b>Light-ON mode</b>  <b>ON:</b> No beam is interrupted  <b>OFF:</b> One beam or more is interrupted		<b>L-ON (LIGHT ON)</b>	<p>The following diagram shows the relationship between the picking instruction input, picking indicator status, and external picking indicator output. DIP switch 1 is used to switch the picking display mode between all lighting, all flashing, elevator-like lighting, and accordion-like lighting. It is also possible to switch the external picking indicator display mode between lighting and flashing.</p> 

## Setting Method

### NPN Open-collector Output Models

#### DIP Switch 1 Mode Switching

##### Emitters

DIP switch 1	Function	OFF(left) ( <input type="checkbox"/> )	ON(right) ( <input checked="" type="checkbox"/> )
1	Flash Pattern (picking display mode setting)	See table below. *1	
2	Flash Time *2 (picking indicator flashing speed setting)	Slow	Fast
3	External Flash Pattern (external picking display mode setting) *3	Lit	Flashing
4	Not used.	---	---
5	Frequency Setting *4	A (frequency A)	B (frequency B)

##### Receivers

DIP switch 1	Function	OFF(left) ( <input type="checkbox"/> )	ON(right) ( <input checked="" type="checkbox"/> )
1	Flash Pattern (picking display mode setting)	See table below. *1	
2	Flash Time *2 (picking indicator flashing speed setting)	Slow	Fast
3	Operation mode setting	Dark-ON	Light-ON
4	Sensing distance (sensitivity) setting	LONG mode (1 to 3 m)	SHORT mode (0.05 to 1 m)
5	NC	---	---

\*1. DIP Switch 1 Picking Display Mode Setting

DIP switch 1	SW 1-1	SW 1-2	Display mode
	OFF	OFF	All lighting (All six indicators light.)
	ON	OFF	All flashing (All six indicators flash simultaneously.)
	OFF	ON	Elevator-like lighting (Two adjacent indicators simultaneously light so that lighting moves up and down.)
	ON	ON	Accordion-like lighting (Some or all indicators simultaneously light so that lighting moves like an accordion.)

\*2. The flashing speed can be changed in picking display mode (all flashing, elevator-like lighting, or accordion-like lighting) or in external picking display mode. The flashing speed varies with each display mode.

\*3. This setting is supported for F3W-D052□P-L Emitters only.

\*4. Mutual Interference Prevention Function:

The frequency selector is used to switch the emitting frequency between A and B. Making the emitting frequencies of two Sensors different helps prevent malfunction caused by mutual interference.

F3W-D052B(P)-D

## Safety Precautions

Refer to *Warranty and Limitations of Liability*.

### WARNING

**Do not apply the F3W-D as safety mechanisms used in pressing machines or any other safety mechanisms for protecting the human body from danger.**

- (1) Do not apply the F3W-D as safety mechanisms used in pressing machines, shears, rolling machines, spinning machines, cotton mill machines, or robots for the protection of an operator's hands and body.
- (2) The F3W-D is designed for detection of the human body or moving objects in the detection area but not for protection against danger.
- (3) The F3W-D or any product incorporating the F3W-D may be exported to any country. Should the F3W-D cause any problem conflicting with local laws or related to product liability locally, however, OMRON shall, without exception, assume no responsibility for it.

### Precautions for Safe Use

#### ● Operating Environment

- Do not use the Sensor in an environment containing flammable or volatile gases.
- Do not use the Sensor underwater.
- Do not disassemble, repair, or modify the Sensor.
- Always turn OFF the system power before installing or replacing the Sensor.
- Applying excessive force to the mode switch may result in damage. Do not apply a force of more than 5 N.

### Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

#### ● System Design

##### Mutual Interference Prevention Function

When using more than one set of the Sensors, install and configure them so that no Mutual Interference occur.

##### (1) Two Sets of Sensors:

Set these Sensors to different frequencies with the frequency selector. Refer to *DIP Switch 1 Mode Switching* on page 6.

If the mutual interference prevention function is not used, and there are two Sensors with the same frequency setting, a beam from the Emitter of one Sensor may hit the Receiver of the other Sensor, resulting in malfunction.

This function cannot prevent mutual interference between the F3W-D Sensor and a Photoelectric Sensor of a different model.

##### (2) Three or More Sets of Sensors:

When 3 or more sets of Sensors are used in parallel, mutual interference may result in malfunction. Take the following measures to prevent mutual interference, and check for mutual interference.

While in LONG mode, the Sensors are more easily affected by interference. Therefore, if the distance between the Emitter and Receiver of a Sensor is 1 m or less, use the SHORT mode.

- The distance between two adjacent sets of Sensors must be at least  $l_1$  or  $l_2$ , which does not cause mutual interference between two Sensors with the same frequency setting.  $l_1$  or  $l_2$  is at least 1.5 times the distance shown in Parallel Operating Range of the Engineering Data.

## Vertical Installation

## Horizontal Installation

- Install a baffle so that there will not be mutual interference between Sensors with the same frequency setting. (See Figure 1.) A light reflection from the wall or floor may go around a baffle and reach the Receivers. Install a baffle so that it will also block any light reflection. (See Figure 2.)

Figure 1

Figure 2

## Wiring Precautions

### Connection

- Before turning ON the power, make sure that the supply voltage is within the maximum allowable voltage range.
- Always connect the sync lines.
- Be very careful not to get metal chips in the connector, especially during wiring.
- Incorrect wiring may damage the equipment. Make sure that the cable length and routing are appropriate to prevent the connectors and cables from getting disconnected.
- Always leave the operation cover closed during operation.

### Cables

Make sure that the bending radius is 25 mm or more.

## Installation Precautions

### Installation

- Install the Sensor so that its sensing face will not receive light from the sun, fluorescent lamps, incandescent lamps, and other light sources.
- Do not strike the Sensor with a hammer or any other tool during installation, otherwise the internal circuits of the Sensor may be damaged.

- Install the Emitter and Receiver in the same orientation as shown in the following figure. (The cables must be in the same direction.)

- Use M4 screws to secure the Sensor body.
- Secure the case to a tightening torque of 1.2 N·m or less.
- Be very careful not to drop the Sensor or screws when securing the Sensor above eye level.
- Do not install the Sensor in reflective configuration.

## Reflection from Wall or Floor

If the Emitter and Receiver are installed as shown in the following illustration, all the axes may not be interrupted due to light reflection from the floor or wall. Make sure that the Emitter and Receiver detect the sensing object properly before using the F3W-D in actual operation.

### Side View

### Top View

## Adjustment

### Operation and Stability Status Display

- The following illustration shows the indicator status corresponding to each incident level.
- Install the Receiver so that the green stability indicators are both ON in light receiving status.

\* If the Receiver is set to the stable light-receiving area, it will become more resistant to environmental fluctuations such as temperature, voltage, dust, and setting deviation after installation. For applications where a stable light-receiving area is not obtained, attention must be paid to environmental fluctuations.

## Error Display

F3W-D052 Picking Sensors are provided with only one error display mode.

If an error occurs, the indicator on the Sensor's Receiver, as indicated by the arrow in the diagram on the right, will flash.

The error indicated in this example is a synchronization error.

The possible causes are as follows:

1. The sync line is not connected.
2. The sync line is shorted with another line.
